Remove text within quotes in a string

I am reading file values by position with comma-separated string and it gives me incorrect values on the below line because there is a comma within double quotes within a string.

I would like to remove any text that has quotes with object script or alternatively separate each value with pipe-delimited so that I can return position 8 as code and position 9 as a description

```
s line = file.ReadLine()
```

```
s description = $P(line, ",", "9")
```

```
s code = $P(line, ",", "8")
```

```
12162,CHAPTER I,Certain infectious and parasitic diseases (A00-B99),003 (A20-A28),Certain zoonotic bacterial diseases,A28,"Other zoonotic bacterial diseases, not elsewhere classified",A28,"Other zoonotic bacterial diseases, not elsewhere classified",N,N,N,N,N,,,,,,,,,
```
