## How Can I Call %SYSTEM class methods from Embedded Python?

Hi, devs!

What's the way to call the methods of %SYSTEM class from python?

I tried this way:

```
print(iris.cls('_SYSTEM.OBJ').Version())
```

and getting an error:

```
Traceback (most recent call last):  
  File "<input>", line 1, in <module>  
RuntimeError: iris.class: error finding class
```

Here is how it works in ObjectScript:

```
USER>w ##class(%SYSTEM.OBJ).Version()  
InterSystems IRIS Version 2022.1.0.209  
USER>
```

Thoughts?
