## [Video] Modern(izing) Full Stack Development on InterSystems IRIS

Hi Developers,

Enjoy watching the new video on [InterSystems Developers YouTube](#):

[Modern\(izing\) Full Stack Development on InterSystems IRIS @ Global Summit 2022](#)

Want to move on from CSP/Zen, but not sure how? Leverage InterSystems-backed tools available on the Open Exchange for rapid REST API development for new and existing data models, along with unified packaging via the InterSystems Package Manager. We'll cover Open Exchange packages, such as isc-json, isc-rest, and isc-ipm-js, plus one or two demo applications to tie it all together.

Presenter: [@Timothy Leavitt](#), Application Services Development Manager, InterSystems

Enjoy watching and stay tuned!
