## Welcome new partner, a leader in pain assessment

Hi Community:

Thought you might be interested in this new partner we just signed in Sydney -- [PainChek® Ltd.](#), the Australian-based developer of the world ' s first pain assessment and monitoring application for smartphones. Its software-as-a-service, artificial intelligence platform uses smart devices with cameras to accurately evaluate pain levels.

PainChek is using InterSystems IRIS for Health™ and integrating its application with electronic medical record (EMR) systems – including InterSystems TrakCare®.

In Australia, New Zealand, the United Kingdom, and Singapore, PainChek ' s application is already used in 1,500 eldercare facilities, where over 50% of residents have dementia and may not be able to communicate their pain levels. PainChek hopes to expand into other markets, including hospitals and home care.

You'll find more information in this [press release >](#).
