[Off-Topic] How would you encourage or teach your interest about computers and electronics / and or programming to your kids or teens, or even adult sons / daughters?

Hello,

Thank you for reading this question, and thank you for your time and replies.

I was wondering which ways, tools, mechanisms, or vias would you recommend to teach to kids, teens, adults, being your sons / daughters or not; your passion or likelihood for programming and computers?

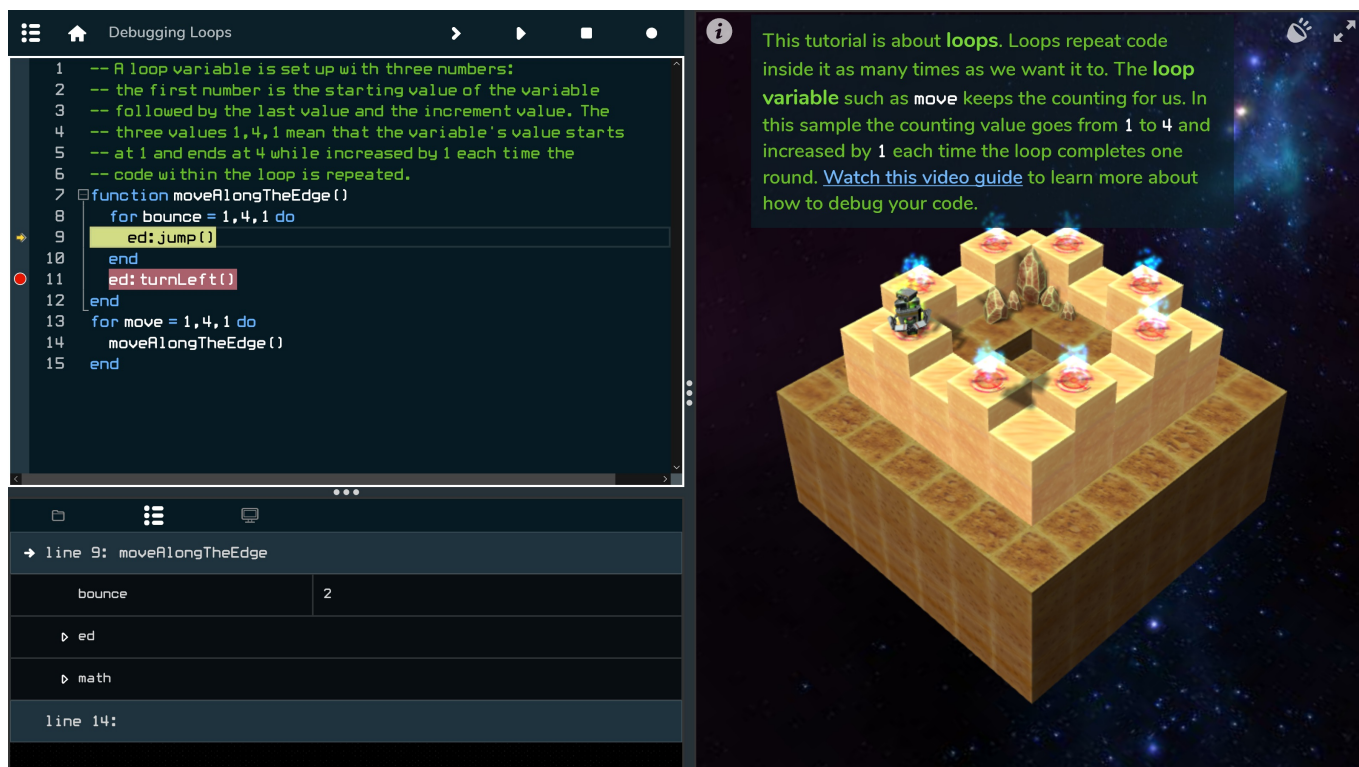

I know there are some programming free games like the following ones:

<https://wintrmut3.itch.io/maelstromexe>

<https://niandra.itch.io/just-add-eggs>

<https://jaywee1115.itch.io/code-ed>

<https://ratking.itch.io/chipcode>

Even more, there are some sites which propose you small challenges:

<https://www.codewars.com/>

However, what would you suggest, recommend, to teach or share with other people your interest in computers and programming?

Thanks for your replies.

Thanks for your replies.

Greetings.
