Managing InterSystems Servers December 5-9, 2022 - Registration space available

[Managing InterSystems Servers](#) December 5-9, 2022 9:00am-5:00pm US-Eastern Time (EST)

- This five-day course teaches system and database administrators how to install, configure and secure InterSystems server software, configure for high availability and disaster recovery, and monitor the system. Students also learn troubleshooting techniques.
- This course is applicable to both InterSystems IRIS and Caché. Although the course is mostly platform independent, students can complete the exercises using either Windows or Ubuntu.
- [Self Register Here](#)
