Upgrade Caché version

Hi everybody!

I'm new to a Caché world and need some help! Where I work we are running Cache 2016.1 version in a server, and 2018.1 in another server. I want to upgrade the version 2016.1 to 2018.1, but I fear it can raise some errors that I can't resolve yet. My doubt is, if I upgrade it will run ok?

Thanks in advance!
