Trigger, Insert after

Hi, how do I create a trigger that will only set the value of the "Status" field for new objects, not for all available?

Class CarDealer.Order Extends (%Persistent, %Populate)

{

Property Title As %String

Property Status As %String(VALUELIST = ",InProgress,Done,Canceled");

Trigger setStatus [Event = INSERT, Foreach = row/object, Time = AFTER]

{

&sql(update CarDealer.Order set Status = 'InProgress')

}

[#Object Data Model](#) [#ObjectScript](#) [#SQL](#) [#Caché](#)
