[Video] Let InterSystems IRIS Do the Work: Git Source Control & Linting ObjectScript Across Editors

Hey Community,

Enjoy watching the new video on [InterSystems Developers YouTube](#):

[Let InterSystems IRIS Do the Work: Git Source Control & Linting ObjectScript Across Editors @ Global Summit 2022](#)

Learn about two Open Exchange projects, git-source-control and isc-codetidy, which help in the development process independent of your code editor of choice. Isc-codetidy is new to the Open Exchange, while git-source-control was demonstrated in a session last year and has seen significant improvement thanks to input from the developers who use it.

Presenters:

[@Sarmishta Velury](#), Developer, Application Services, InterSystems

[@Timothy Leavitt](#), Application Services Development Manager, InterSystems

Hope you like it and stay tuned!
