Announcing the InterSystems Container Registry web user interface
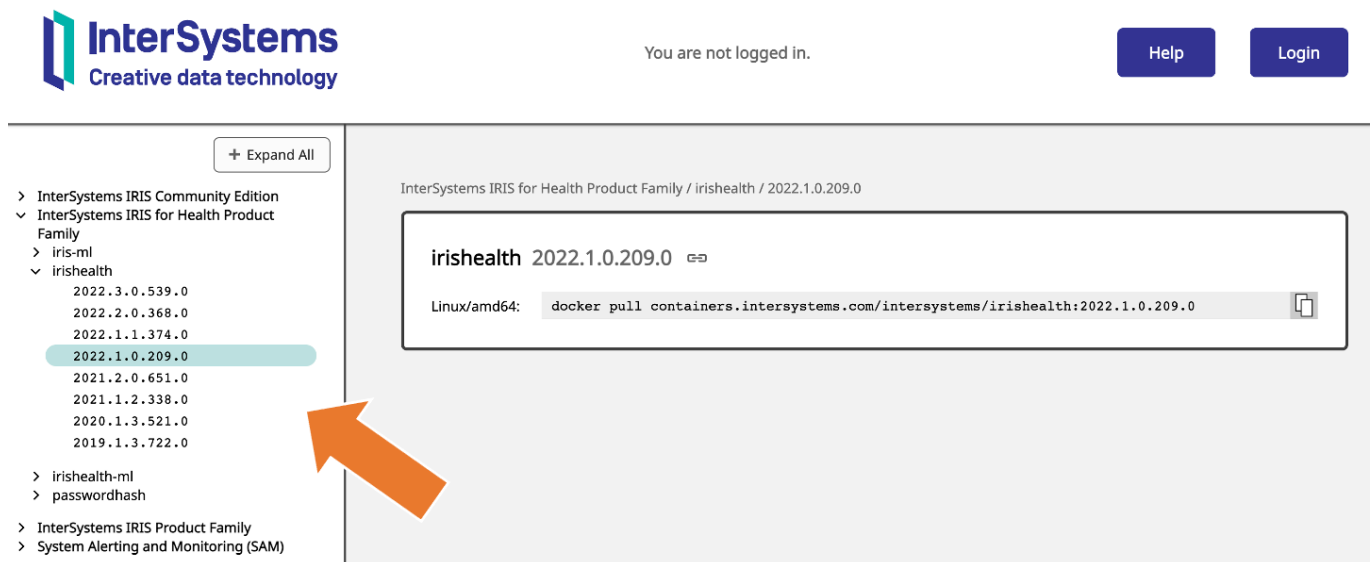

Announcing the InterSystems Container Registry web user interface

InterSystems is pleased to announce the release of the InterSystems Container Registry web user interface. This tool is designed to make it easier to discover, access, and use the many Container images hosted on ICR.

The InterSystems Container Registry UI is available at: https://containers.intersystems.com/contents

Community Edition Containers

When you visit the [ICR user interface](#), you'll have access to InterSystems' publicly available containers, including the IRIS community edition containers. Use the left-hand navigation to select the product family that interests you, then the container, and finally select the specific version.

Enterprise Edition Containers

You can see the private containers, including the IRIS enterprise edition, by clicking on the **Login** button. Once logged in, the left-hand navigation will include all the containers you have access to.

Enjoy!
