Video: Using Deltanji for Source Control of Interoperability Productions

Check out this short demo on the InterSystems Developer YouTube channel showing how the new Production Component Driver can be used for Source Control of Interoperability Productions.

The driver enables highly granular management of interoperability productions with tight integration into the InterSystems IRIS management portal.

About Deltanji source control:

Deltanji provides effective configuration management, versioning, and process control within development teams. This offers clear visibility of the development process and, in turn, improves your system's code quality and maintainability. It can be configured to suit your needs, whether you're an individual developer or part of an international organization.

To find out more get in touch with us using the contact details at the end of the video, or via georgejames.com.
