Web Application 'Api Atelier'

Hi,

I have two versions of Cache running on two separated servers. In one server, the version is 2018.1, and have the web application 'api/atelier', and the other server the version is 2016.1.

The question is, can I export the web application 'api/atelier' from 2018.1 and import/install it on 2016.1 version?

Thanks!

#Caché
Product version: Caché 2016.1
$ZV: Cache for Windows (x86-64) 2016.1.1 (Build 107) Sat Jun 11 2016 18:49:07 EDT
