Intellisense and code completion in VS code objectscript

When I'm writing code in InterSystems Studio code completion is different than in VS Code. It would be greate if VS Code would react the same way on code completion .. This happens is studio

```
set tObservation = ##class(HS.SDA3.Observation).%New()
set tObservation.Obrvr = "Observation"
set tObservation.ObservationCode = "rib-FunctionalO MentalStatus"
set tObservation.ObservationCode = "rib-FunctionalO MentalStatus"
set tObservation.ObservationCode = "rib-FunctionalO MentalStatus"
set tObservation.ObservationCode = "rib-FunctionalO MentalStatus"
set tObservation.ObservationCode = "rib-FunctionalO MentalStatus"
set tObservation.ObservationCode = "rib-FunctionalO MentalStatus"
set tObservation.ObservationCode = "rib-FunctionalO MentalStatus"
```

When I do this in VS Code it doesn't show the object but it shows ?? all possible items ??

```
Set tObservation = ##class(HS.SDA3.Observation).%New()
```

```
set tObservation.
```

```
set tObservation. abc #Class
```

```
set tObservation. abc #class
```

```
set tObservation. abc #dim
```

```
set tObservation. abc #this
```

```
set tObservation. abc $$$ISERR
```

```
set tObservation. abc $$$OK
```

```
set tObservation. abc $$$TRACE
```

```
abc $C
```

```
abc $C
```

```
abc $C
```

MentalStatus"

Status"
