Can't get a valid access token in FHIR Server with OAuth2

Hi!

I'm playing with OAuth2 with FHIR Server, but returned tokens cause 401 or 403 errors when trying to get FHIR resources.

I tried using [fhir-client.js](#) and Postman. Access tokens returned have been failing for both, with a 401 when trying through fhir-client.js and a 403 using Postman.

Here are my settings:

OAuth2 server

OAuth2 user

OAuth2 application

fhir-client.js launch page

fhir-client.js redirect page (index.html)

fhir-client.js response

Postman

I tried out the same example with the [SMART on FHIR Launcher](#) and all works as expected:

SMART Launcher

Any help will be appreciated!

Thanks!
