Data Export/Import of %SYS.%Library.sysSQLConnection

I am trying to migrate our SQL Connections from HealthShare Health Connect 2018.1.3 to IRIS HealthShare Health Connect 2022.2 using the Data Export/Import Wizard through the Management Portal. I am able to export the data fine, but I am running into issues trying to Import it into 2022.2 using the Data Import Wizard. When I run through the steps it is not importing everything from the txt file I created from 2018.1.3. I would rather not have to rekey all the connections if possible.

Here is the Background Task Error Log

The screenshot shows a table with columns: Type, Error Number, Error Text, and Row. The error text for all rows is: "-104 Field validation failed in INSERT or value failed to convert in DisplayToLogical or ObectToLogical: Field '%Library.sys_SQLConnection.pwd' (value '...') failed validation". The error numbers are consistently -104. The rows are numbered 16 through 35.

Is there a way around this Validation error? Should I not export the passwords then just rekey the passwords into 2022.2?
