[Open Exchange](#)

EN Interopway XDBC

Hey guys!!!

I finally got some time to organize a set of classes that I've been using for a few years to make it easier and kill the repetitive work of developing integrations using XDBC.

Access the project repository at <https://github.com/cristianojs/interopway>

I've already registered on the Open Exchange. I'm wait for approval.

The idea is to increase the project with more components, I already have one that the "dough is rising and is already going to the oven".

Any questions post here.

Big hug.
