How do I apply for the NoPWS Early Access Program (EAP)?

Early Access Program (EAP) is a way to to deliver specific features early to a group of people who will test and provide feedback on that feature.

One of those EAPs is about the the **discontinuation of the Apache web server installation (a.k.a. NoPWS)** from IRIS product installers. If you're interested in this topic and want to test it, the way to register is to send an email to nopws@intersystems.com. Use this same email for any other feedback.

Once you get a confirmation email, you'll see the EAPs you have access in the Evaluation Services website. You must log in to see the content.

So, after logging in:

1) EAPs are in the right side of the screen:

Click on "Download Early Access Programs" and go to the next screen.

2) Select the EAP you're enrolled in. Using NoPWS as the example here:
