How to add InterSystems certification to your DC profile

Hello Community,

Some of you have passed the [InterSystems Official Certification](#) and would like to get a nifty green tick on your profile avatar

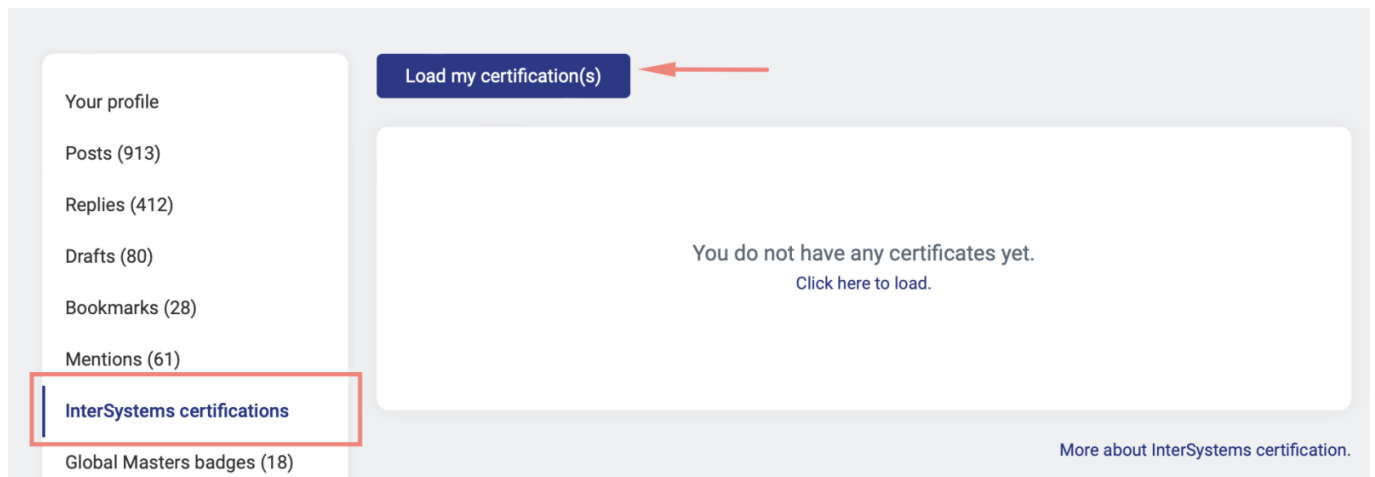

and all your certificates in your DC profile so that others know that you know... you know what we mean 😊

So, to add certification to your DC profile, you need to take 3 easy steps:

- 1 Go to your DC profile
- 2 Go to the InterSystems Certification section
- 3 Click on the Load my certification(s) button

and that's it!

The system will send the request to Credly with your DC email. If your certification is linked to the same email, your certificates will be loaded automatically:

How to add InterSystems certification to your DC profile

Published on InterSystems Developer Community (<https://community.intersystems.com>)

The screenshot shows a user profile for William Glover. On the left is a sidebar with navigation links: Profile page, Posts (11), Replies (6), Mentions (2), InterSystems certifications (selected), Global Masters badges (6), Followers (0), and Following (0). The main content area displays two certifications:

- HealthShare Health Connect HL7® Interface Specialist**
This certification proves Specialist-level competency in the design, building and basic troubleshooting of HL7 v2.x interfaces using InterSystems tools and technologies.
★ Skills: HL7 · Interface · InterSystems · Software · Software Development
📅 Expiration date: Dec 10, 2026
📋 Earning Criteria: Passing score on the HealthShare Health Connect HL7 Interface Specialist exam.
- InterSystems IRIS Core Solutions Developer Specialist**
This certification proves Specialist-level competency for developers who build applications using ObjectScript and other IRIS technologies.
★ Skills: Computer Science · Engineering · InterSystems · OOP · Software Development · SQL
📅 Expiration date: Oct 14, 2027
📋 Earning Criteria: Passing score on the InterSystems IRIS Core Solutions Developer Specialist exam.

On the right, the user's profile information is shown: William Glover, Certified specialist, Integration Engineer at ReStart Consulting, with a placeholder for a profile picture and social media icons. Below this is a 'User statistics' section with links for Posts and Replies.

If not, please follow the detailed steps described on the page:

The screenshot shows a button labeled 'Load my certification(s)'. Below it is a message box stating: 'You do not have any certifications yet, or your Credly account is linked to a different email address than your InterSystems account. If you are sure that you have up-to-date InterSystems certification(s), but your Credly account is registered to another email, follow the instructions below to add it to your profile.'

Step 1: Go to the Credly website and sign in to your profile:

A browser window is shown with the address bar displaying 'credly.com/users/sign_in' and the Credly logo on the page.

And you're done. Now everyone knows that you know... ;)

Congratulations on adding the Certification and on actually passing it. Well done!
