How to use objectscriptquality server-side

Hi.

This is my first post on this forum; I've tried to open an issue on the [official repo](#) , but it seems inactive from more than a year, so I can't receive an answer from there.

I would like to know if someone use that extension and know how to use it when working server-side on an IRIS server.

I have no problem when coding on a file saved locally.

Thanks in advance
