Setting up default port in Apache for Web Apps

Hi Guys,

we this format of url with port required, and my guess that if we specify port 57772 as the default port in the web server which I'm assuming that would be Apache , we don't have to specify the port in our url, so how can set a default port in Apache?

<http://localhost:57772/us-serenity/MSDS.SelectApplication.UI.SelectAppli...>

Thanks
