Limiting Access in Caché

I want to grant access to view the Error Trap in System Management Portal to certain admins, without giving them access to anything that would alter Caché behavior, such as users or database sizes. I was looking for a granular Resource that would do this, but haven't been able to find what I'm looking for.

Secondly, I granted %Developer role to my developers, but they don't appear to be able to use custom menus in Cache Studio until I grant them %All. Is there a granular Resource that I could use to add to a custom Role and grant to them that would allow custom menus in Cache Studio?

[#Access control](#) [#Development Environment](#) [#Error Handling](#) [#Management Portal](#) [#Studio](#) [#Caché](#)

Product version: Caché 2017.1

\$ZV: Cache for UNIX (Red Hat Enterprise Linux for x86-64) 2017.1.3 (Build 317018571)
