How does Ens.Alert and BadMessageHandler work in Ensemble production

Hi Community,

I have created a HL7 production in my working environment, Ens.Alert ,EMailAlert, PagerAlert, and BadMessageHandler are created.

Can anyone explain how Ens.Alert and BadMessageHandler will work when an HL7 message in Passed in Business service and how these 2 are related when any error occurs in the Production envinorment?

#Business Service #Error Handling #Interoperability #ObjectScript #Ensemble
Product version: Ensemble 2018.1
$ZV: Cache for Windows (x86-64) 2018.1.1 (Build 312_2118937U) Fri Apr 26 2019 17:58:36 EDT
