Exiting terminal without losing job

Hi Guys,

Sealy question but I'm between a hard and rock :)

I've a running method that deletes a list of records and its has been running for hrs and did place locks so other processes can't progress, and to what I can see it will still run for a few more hours, so how can I stop this process at this point without losing what already has been deleted?

If I close the terminal all records that has been deleted will roll back as it happened to before ?

US-SERENITY>d ##class(MSDS.Common.JobTimeStamps).deleteOldRecords()

US-SERENITY>D ##class(SX3.Utilities).ReleaseTasks()
Done, Please check tasks running..
US-SERENITY>d ##class(MSDS.Common.JobTimeStamps).deleteOldRecords()
```

```
ClassMethod deleteOldRecords() [ ZenMethod ]
{
    //&Sql(delete from MSDS_Common.JobTimeStamps where ID<17000000)
    &Sql(delete from MSDS_Common.SampleJson where ID<574000000)
}
```

Thanks
