It is not possible debug with current community docker version

When I try to debug using the docker image intersystemsdc/iris-community it is failing. If I change to intersystemsdc/iris-community:2022.3.0.555.0-zpm, I have success.

Sorry, change to: intersystemsdc/iris-community:2022.1.0.209.0-zpm
