New Podcast: Source Control and Developer Tools with George James Software

In our latest episode of [Data Points](#), I had a conversation with George James, CEO of George James Software, about the importance of source control and developer tools, George James Software's own solutions, and their partnership with InterSystems. Take a listen, and visit <https://georgejames.com> to learn more about George James Software!

For more information and to subscribe to the podcast, head over to <https://datapoints.intersystems.com>.
