## NEED NUMBER ROWS IN SQL SELECT

Hi guys,

I'm trying find a way to create a row with the number of each row.

For example:

	TIPO	EMPRESA	INSCRIÇÃO_PAGADOR	DESTINATARIO_NF_INSCRICAO_NUMERC	CODIGO_FORNECEDOR	
1	01	TEXTIL FARBE S.A.	81303463000477	11703922000181	11,948	HYO
2	01	TEXTIL FARBE S.A.	81303463000477	11703922000181	11,948	HYO
3	01	TEXTIL FARBE S.A.	81303463000477	11703922000181	11,948	HYO

In the SQL above, i want a way to create a collum with the number of corresponding row, in this case:

- 1
- 2
- 3

In SQL SERVER i can use FOR, RANK or ROWNUMBER to do this, but, i can't find a way to do the same in cache SQL.

Can someone help me?

Thank you.
