[Webinar] Demo of Deltanji: source control tailored for InterSystems IRIS

[Community webinars](#) are back!

And we're thrilled to invite you to the webinar of [George James Software](#), partners of InterSystems:

[D'emo of Deltanji: source control tailored for InterSystems IRIS"](#)

Join this webinar to learn how the [Deltanji](#) source control can seamlessly integrate into your development lifecycle and see a demonstration.

Date & Time: Thursday, February 23, 4 pm GMT | 5 pm CET | 11 am ET

Speakers from [George James Software](#):

- [@George James](#), CEO
- [@John Murray](#), Senior Product Engineer
- [@Laurel James \(GJS\)](#), Marketing and Business Development Manager

What will be discussed during the webinar:

How the source control integrates with your system is imperative in ensuring it works seamlessly behind the scenes without interruption. [Deltanji](#) source control, by [George James Software](#), understands the internal workings of InterSystems IRIS and provides a solution that can seamlessly handle its unique needs. It has client integrations for VS Code, Studio, Management Portal, and Management Portal Productions.

This demo will show how Deltanji goes beyond the traditional CI/CD pipeline, automating the project lifecycle from development through to deployment, making it the perfect source control companion for organizations with continually evolving systems. It will also include a demo of the new Production component driver, which enables highly granular management of interoperability Productions with tight integration into the Management Portal.

Using Deltanji will improve the quality of both the development process and the overall health of a system - ensuring developers are working on the correct code and preventing regressions and other problems that can result in poor code quality and increased costs. Deltanji has been widely adopted by software consultants, large international organizations, and everyone in-between who works with InterSystems environments.

Sounds very interesting and useful!

Don't miss this opportunity to learn more about Deltanji source control and its use in InterSystems projects!
