## Community Roundtable: AI / ML

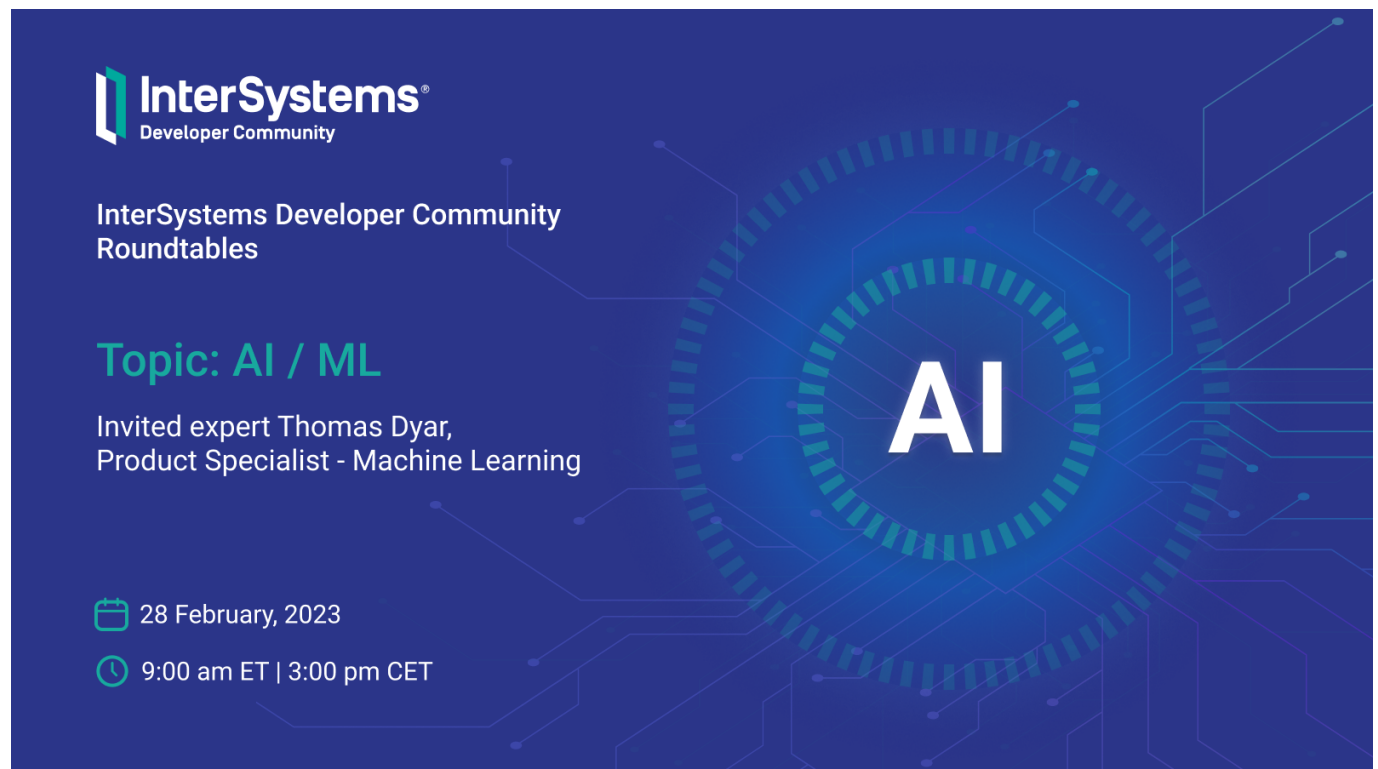

Hi Community,

We are gathering again for the next Community Roundtable. Many of you asked for a roundtable about AI / ML, and we are delighted to bring such a roundtable to you!

Our invited expert from InterSystems: [@Thomas Dyar](#) Product Specialist - Machine Learning.

Join our 60-min discussion, prepare your questions, and use cases! There will be a short demo as well.

UPDATE: the recording is available [here](#).

A promotional graphic for an InterSystems Developer Community Roundtable. The background is dark blue with a circuit-like pattern of glowing lines and dots. In the center, the letters 'AI' are prominently displayed in white, surrounded by concentric circles of small, glowing blue squares. On the left side, the InterSystems logo is at the top, followed by the text 'InterSystems Developer Community Roundtables'. Below that, the topic 'Topic: AI / ML' is written in a light blue font. Further down, it says 'Invited expert Thomas Dyar, Product Specialist - Machine Learning'. At the bottom left, there are two icons: a calendar icon next to the date '28 February, 2023' and a clock icon next to the time '9:00 am ET | 3:00 pm CET'.

Date: February 28

Time: 9:00 am ET | 3:00 pm CET

What questions do you want us to cover on this roundtable? Please share them in the comments to this post.
