SOAP - How to create soap and call my StoredProc function from external website?

Hi Every one

I'm working on how to use SOAP with my API and StoredProc.

Currently, the method I use is csp page to be able to get pamater from external website and Call my StoredcProc
Step 1 Get pamameter from external site
Step 2 Run My Storeproc
Step 3 Return JSON format

How to create soap and call StoredProc function from external website?
