## Announcing developer preview #3 for InterSystems IRIS, IRIS for Health, & HealthShare Health Connect 2023.1

InterSystems announces its third developer preview, as part of the developer preview program for the 2023.1 release. Many updates and enhancements have been added in 2023.1 and there are also brand-new capabilities, such as production-ready support for Columnar Storage, ability to use Bulk FHIR, and support to MacOS 13 Ventura. Some of these features or improvements may not be available in this current developer preview.

Future preview releases are expected to be updated biweekly and we will add features as they are ready. Please share your feedback through the [Developer Community](#) so we can build a better product together.

Documentation can be found at these links below. They will be updated over the next few weeks until launch is officially announced (General Availability - GA):

- [InterSystems IRIS](#)
- [InterSystems IRIS for Health](#)
- [HealthShare Health Connect](#)

In addition, check out this [link](#) for upgrade information related to this release.

As usual, Extended Maintenance (EM) releases come with classic installation packages for all supported platforms, as well as container images in Docker container format. For a complete list, refer to the [Supported Platforms document](#).

Installation packages and preview keys are available from the WRC's [preview download site](#) or through the [evaluation services website](#) (use the flag "Show Preview Software" to get access to the 2023.1).

Container images for both Enterprise and Community Editions of InterSystems IRIS and IRIS for Health and all corresponding components are available from the new [InterSystems Container Registry](#) web interface. For additional information about docker commands, please see this post: [Announcing the InterSystems Container Registry web user interface](#).

The build number for this developer preview release is 2023.1.0.207.0.

For a full list of the available images, please refer to [the ICR documentation](#). Alternatively, tarball versions of all container images are available via the WRC's [preview download site](#).
