Error when Creating a Parameter in PowerBI using Cache ODBC

Hello, I am using the power bi report builder tool to create a report with dynamic parameters. Every time I try to create and apply a parameter in power bi query editor. I get the below listed error message.

FYI: I have created a Data source connection using "InterSystems ODBC" Version 2015.01.00.429. I am getting data without any issue.

Query: select PaymentHistory.OCCURENCE_DATE from PaymentHistory where
PaymentHistory.OCCURENCE_DATE >= @BeginDate

Error Message: ERROR [42000] [Cache ODBC][State : 37000][Native Code 12]
[C:\Program Files\WindowsApps\Microsoft.PowerBIReportBuilder15.7.1801.0x648w]
[SQLCODE: <-12>:<A term expected, beginning with one of the following: identifier, constant, aggregate, \$\$, :, (, +, -, %ALPHAUP, %EXACT, %MVR, %SQLSTRING, %SQLUPPER, %STRING, %TRUNCATE, or %UPPER>]
[Location: <Prepare>]
[%msg: < A term expected, beginning with either of: identifier, constant, aggregate, \$\$, (, :, +, -, %ALPHAUP, %EXACT, %MVR %SQLSTRING, %SQLUPPER, %STRING, %TR

Any help to resolve this issue will be greatly appreciated.

Thanks
