Stream migration from old Caché format to IRIS

During a migration from a rather old Caché Version (2016.1) to IRIS

I met the problem to migrate Streams.

The difference in the storage Global is minimal

It's not a big effort to do it manually for a few streams.

But for some thousand streams I hope there is a tool already available.

But where?

[#Globals](#) [#Caché](#) [#InterSystems](#) [IRIS](#)

Product version: IRIS 2022.2
