[Video] Passwordless mode for development with InterSystems IRIS

Hey Community,

Tired of entering login-password during the docker build with your InterSystems IRIS every time?

There is a handy way to turn it on and off – use the [passwordless zpm module](#).

Watch this video to explore how to use the passwordless ipm module to turn on and off entering login-password during docker build with your InterSystems IRIS:

[Passwordless mode for development with InterSystems IRIS](#)

Add zpm "install passwordless" in %SYS namespace during your docker build phase, and IRIS will no longer ask for a password.

[Example application](#) with passwordless.
