VIRTUAL SUMMIT

Creating an Adaptive Organization

Join us in October for three great weeks of content for our first-ever Virtual Summit. With a focus on "Creating an Adaptive Organization," we'll show you what businesses thrive amid disruption, the ways our technology can help you adapt, and how to make your enterprise nimble and responsive.

Keynote Speakers Announced

Just announced! Joining us at Virtual Summit 2020 will be:

Dr. Bruce Walker, founding director of the Ragon Institute of Harvard, MGH, and MIT, which is currently working on a COVID-19 vaccine. He will tell us about the quest for a COVID vaccine and the need for agility in life sciences.

MIT Professor Fiona Murray, an authority on the transformation of investments in scientific and technical innovation into entrepreneurship. She will discuss the need for adaptability in the business world.

Also presenting from InterSystems

Terry Ragon, CEO and founder

Don Woodlock, head of healthcare solutions

Scott Gnau, head of data platforms

John Paladino, head of client services

Jonathan Teich, head of HealthShare product management

Stay tuned for more speaker announcements!

Focus Sessions

There will be more than 70 technical focus sessions divided into all our product areas (data platforms, InterSystems HealthShare®, FHIR®).

Virtual Experience Labs

From November 2 - November 5, you'll be able to participate in five different virtual Experience Labs, which allow you to get your hands on our newest technologies:

- API Manager
- InterSystems IntegratedML™
- InterSystems HealthShare Provider Directory
- InterSystems Reports
- VSCode

Ask the Experts

This is the Tech Exchange portion of Global Summit virtualized! Schedule one-on-one meetings with experts from learning services, product development, support, or product management.

Registration & How It All Works

Registration, which is free, will open soon. **Sign up to receive notifications**, so we can send you a link to register. The virtual conference app will allow you to build your own schedule and receive reminders about the events in which you enroll.

PRODUCT

FHIR Sandbox Upgraded

Our FHIR Sandbox, which went live two years ago, now offers free hands-on exercises, videos, and developer competitions. **Take a look.**

Virtual Care Landing Page

You'll find videos, use cases, blogs, and more on our new virtual care landing page. Take a look.

Visa Gift Card for Your Thoughts: Review Us on Gartner Peer Insight

Thanks to good reviews from many of you, we were selected a Gartner Peer Insights Customers' Choice for the second year in a row this year, and Gartner is already collecting reviews for next year. For a limited time, Gartner is offering a twenty-five-dollar Visa gift card to anyone who completes a survey that it approves. (Gartner will not approve reviews from InterSystems resellers, systems integrators, managed service providers, or independent software vendors.) So please participate at these links:

WEBINARS

[Replay] Enterprise-Grade Source Code Management Webinar

George James, CEO, George James Software
John Murray, senior product engineer, George James Software
Developer Community webinar about how Deltanji from George James Software can control large-scale InterSystems applications throughout the development, testing, deployment, and maintenance cycle. **Replay.**

[Replay] Introduction to VSCode-ObjectScript

Introduction to VSCode-ObjectScript Webinar
Dmitriy Maslennikov, InterSystems developers advocate, CTO at CaretDev
Developer Community webinar about VSCode-ObjectScript, an easy-

to-use and powerful code editor for InterSystems products. **Replay.**

PODCASTS

Contact Tracing and Other Pandemic Data

Dr. Jonathan Teich, HealthShare product management director, InterSystems
Learn why contact tracing is so important in this 30-minute interview produced by the Center for Healthcare Leadership and Management at the University of Texas. **Listen in.**

LEARNING

Meet the Virtual Classroom

We continue to offer **live instruction** via virtual classroom training. Students attend class using Adobe Connect, which enables interaction and discussion throughout. Each student receives an individual cloud-based virtual machine for exercises.

We offer our regularly scheduled classes that anyone may join, held 9 a.m. - 5 p.m. EDT. You can also request a virtual class specific to your company.

- To see upcoming virtual training classes, go to the **course schedule**.
- To register for a virtual training class, go to **course registration**.
- To request a virtual training class for your company, see the **virtual training request form**.
