VIRTUAL SUMMIT

Creating an Adaptive Organization

Join us in October for three great weeks of content for our first-ever Virtual Summit. With a focus on "Creating an Adaptive Organization," we'll show you what businesses thrive amid disruption, the ways our technology can help you adapt, and how to make your enterprise nimble and responsive.

Keynote Speakers Announced

Just announced! Joining us at Virtual Summit 2020 will be:

Dr. Bruce Walker, founding director of the Ragon Institute of Harvard, MGH, and MIT, which is currently working on a COVID-19 vaccine. He will tell us about the quest for a COVID vaccine and the need for agility in life sciences.
MIT Professor Fiona Murray, an authority on the transformation of investments in scientific and technical innovation into entrepreneurship. She will discuss the need for adaptability in the business world.

Also presenting from InterSystems

Terry Ragon, CEO and founder
Don Woodlock, head of Healthcare solutions
Scott Gnau, head of data platforms
John Paladino, head of client services
Jonathan Teich, head of HealthShare product management

Stay tuned for more speaker announcements!

Focus Sessions

There will be more than 70 technical focus sessions divided into all our product areas.

Virtual Experience Labs

From November 2 - November 5, you'll be able to participate in five different virtual Experience Labs, which allow you to get your hands on our newest technologies:

- API Manager
- InterSystems IntegratedML™
- InterSystems HealthShare Provider Directory
- InterSystems Reports
- VSCode

Ask the Experts

This is the Tech Exchange portion of Global Summit virtualized! Schedule one-on-one meetings with experts from learning services, product development, support, or product management.

Registration & How It All Works

Registration, which is free, will open soon. **Sign up to receive notifications**, so we can send you a link to register. The virtual conference app will allow you to build your own schedule and receive reminders about the events in which you enroll.

PRODUCT

Visa Gift Card for Your Thoughts: Review Us on Gartner Peer Insights

Thanks to good reviews from many of you, we were selected a

Gartner Peer Insights Customers' Choice for the second year in a row this year, and Gartner is already collecting reviews for next year. For a limited time, Gartner is offering a twenty-five-dollar Visa gift card to anyone who completes a survey that it approves. (Gartner will not approve reviews from InterSystems resellers, systems integrators, managed service providers, or independent software vendors.) So please participate at these links:

Review InterSystems IRIS® or Caché®

TECHNOLOGY FOCUS

What Is Machine Learning (ML), Automated ML, and InterSystems Integrated ML?

Machine learning (ML) is a branch of artificial intelligence that uses algorithms to find patterns in massive amounts of data. Automated machine learning is a new technology that simplifies the creation of machine learning models, which are the clockwork behind ML. InterSystems IntegratedML™ is automated ML embedded in the InterSystems IRIS data platform. You use it right within your application development environment in SQL.

Why Should I Care?

ML is highly desirable but also very difficult to come by. Creating ML models usually requires rare and expensive data science expertise, which many smaller companies cannot afford. With automated ML, however, even developers with little knowledge of ML can develop sophisticated models with a language (SQL) and tools they already know. Data scientists can use it to complete repetitive tasks.

How Can I Learn More?

Learn IntegratedML in InterSystems IRIS, resource guide

WEBINARS

[Replay] Speed Test: ESG Labs Database Performance Test

Amir Samary, solution architecture manager, InterSystems
Mike Leone, senior analyst, ESG
Joe Lichtenberg, product & industry marketing director, InterSystems
Recent webinar about Enterprise Strategy Group's (ESG's) validation of a test comparing the speed of InterSystems IRIS® with three competitor products. **Replay.**

[Replay] Enterprise-Grade Source Code Management Webinar

George James, CEO, George James Software
John Murray, senior product engineer, George James Software
Developer Community webinar about how Deltanji from George James Software can control large-scale InterSystems applications throughout the development, testing, deployment, and maintenance cycle. **Replay.**

[Replay] Introduction to VSCode-ObjectScript

Dmitriy Maslennikov, InterSystems developers advocate, CTO at CaretDev
Developer Community webinar about VSCode-ObjectScript, an easy-to-use and powerful code editor for InterSystems products. **Replay.**

LEARNING

Meet the Virtual Classroom

We continue to offer **live instruction** via virtual classroom training. Students attend class using Adobe Connect, which enables interaction and discussion throughout. Each student receives an individual cloud-based virtual machine for exercises.

We offer our regularly scheduled classes that anyone may join, held 9 a.m. - 5 p.m. EDT. You can also request a virtual class specific to your company.

- To see upcoming virtual training classes, go to the **course schedule**.
- To register for a virtual training class, go to **course registration**.
- To request a virtual training class for your company, see the **virtual training request form**.
