

# Web ゲートウェイインストール手順

```
# systemctl stop httpd.service      // Apache の停止

# pwd
/data/dur/WebGateway-2023.1.0.229.0-lnxrh8x64/install
# ./GatewayInstall                  // Web Gateway インストール
Starting Web Gateway installation procedure.
```

Please enter platform name: lnxrh8x64

Specify the WebServer type. Choose "None" if you want to configure your WebServer manually.

- 1) Apache
- 2) None

WebServer type <2>? 1

Enter user name used by Apache server to run its worker processes <apache>: ← <Enter>

Please enter location of Apache configuration file [/etc/httpd/conf/httpd.conf]: ← <Enter>

Please enter location of Apache executable file </usr/sbin/httpd>: ← <Enter>

Apache version 2.4 is detected.

WARNING: Gateway version '2023.1.0.229.0' is not newer than the current version ('2023.1.0.229.0').

Any previously installed Gateway files will not be overwritten.

Only files unique to this kit will be installed.

Please enter hostname of your InterSystems IRIS server [localhost]: ← <Enter>

Please enter superserver port number for your InterSystems IRIS server [51773]: ← <Enter>

Please enter InterSystems IRIS configuration name [IRIS]: ← <Enter>

Please enter directory for static CSP content [/opt/webgateway/iris]: ← <Enter>

Do you want to create directory /opt/webgateway/iris [Y]: ← <Enter>

How restrictive do you want the initial Security settings to be?

"Minimal" is the least restrictive, "Locked Down" is the most secure.

- 1) Minimal
- 2) Normal
- 3) Locked Down

Initial Security settings <1>?

← <Enter>

Installing InterSystems IRIS Web Gateway for Apache:

-----  
Apache configuration file: /etc/httpd/conf/httpd.conf  
InterSystems IRIS configuration name: IRIS  
InterSystems IRIS server address: localhost  
InterSystems IRIS server port number: 51773  
Web Gateway installation directory: /opt/webgateway  
-----

Do you want to continue and perform the installation [Y]:

← <Enter>

Will not modify existing /opt/webgateway/conf/CSP.ini.

Updating Apache configuration file ...

- /etc/httpd/conf/httpd.conf

\* You need to restart your Apache server before any  
configuration changes will take effect.

Web Gateway configuration completed!

[root@localhost install]# **systemctl status httpd.service**
